

ATFE200

Exchanger Oil

Universal full Automatic Exchanger Machine for Automatic Transmission oil

Designed to replace completely (100%!) the automatic transmission fluid, and flush the relative circuit, for all car models.

The ATFE 200 machine has the widest self-adaptability characteristics to the circuit in which it is connected, thus, it's a multifunctional machine, suitable **for any type of Automatic Transmission, including robotic gearboxes.**

Extremely high precision, 3gr. for 10 liters, easy to use, versatile and safe against maneuver errors, **it requires only one operator, even non-specialist.**

ATFE200

Exchanger Oil

● Features

- ✓ Electronic board with microprocessor
- ✓ 12V. power supply
- ✓ Grafic display. Self-descriptive driven menu
- ✓ Automatic detection of the direction of fluid flow
- ✓ Suitable for robotic gearboxes
- ✓ Absolute accuracy in the exchange fluid, temp. compensation not needed
- ✓ Requires only one operator
- ✓ Digital fluid measurement
- ✓ Automatic check of new fluid quantity available
- ✓ Automatic check of room volume available in waste tank
- ✓ Fully automatic cleaning additive insertion
- ✓ Fully automatic permanent additive insertion
- ✓ Auto setting specific weight of lubricants
- ✓ Memory of codes and characteristics of favorite fluid types
- ✓ 2 LED to highlight the process status
- ✓ Pump capacity 0.1 - 4 liters/minute
- ✓ Printer - to print the list of operations performed operator, even non-specialist.

● Included items

- ✓ 2 Connecting hoses, length: 4,0 mt.
- ✓ Universal adapters kit for European and Asian cars
- ✓ Top tray for adapters and spares
- ✓ 2 special heavy duty filters
- ✓ 2 Tanks 20 liters each.

● Optional accessories

- ✓ Round shaped adapters with brackets
- ✓ Continuous updating of adapters
